

Flyer for Recruiting Participants for a Nursing Research Study

Please consider taking part in a research study that looks at quality of well-being and impact of events following traumatic limb loss sustained during any military training activity or in combat to include Vietnam, Korea, Iraq, and Afghanistan.

Recruitment Screening Criteria

- Have sustained one or more upper or lower limb traumatic amputation/s in combat or any military training activity;
- And it's been at least a year since your injury...

Your participation will include filling out three questionnaires that takes about 45 minutes. You can complete the forms electronically, by phone, fax, or in-person.

Purpose of this study is to investigate the relationship between well-being to include mobility, and social activity and the impact of the event after a traumatic amputation.

Time frame for recruitment is based on the need to collect data from 50 individuals who are willing to participate.

If you are interested, meet the criteria or know of an individual who may interested and want to discuss or participate in this study;
